

Field Fence Posts

made of recycled plastics

The ecological and economical solution for gardening and landscaping

- > durable and weather-proof
- > easy handling
- > multi-purpose

Available colors: brown and grey

**durable
& weather-
proof**

Durable and weather-proof

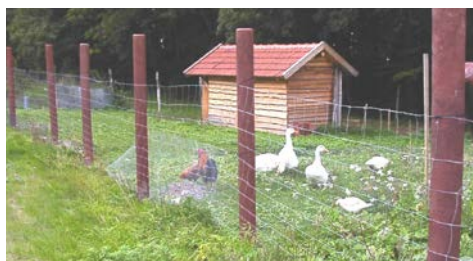

The weight of the field fence posts are significantly lower than comparable products made of concrete. And they have a distinct advantage over wooden posts, because the posts will last a lifetime.

Easy handling

The posts can be cut with a standard buzz saw to the desired length. Insulators, planks or boards can easily be screwed on. Also staples can be used. Wires or electric cables can be pulled through drilled holes.

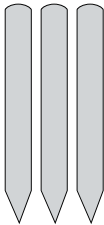

Multi-purpose

The posts can be used in many ways: whether to fence a meadows, a plot of land or as separately standing bollards.

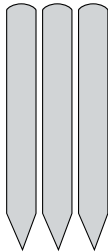

Available Sizes

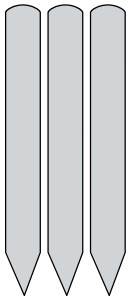

| Length | Diameter | Weight | Color |
|--------|----------|--------|-------|
| 150 cm | 4,5 cm | 2,2 kg | brown |
| | | | grey |
| 175 cm | 6,0 cm | 4,6 kg | brown |
| | | | grey |
| 200 cm | 8,0 cm | 9,3 kg | brown |
| | | | grey |

Diameter: 4,5 cm
Length: 150 cm

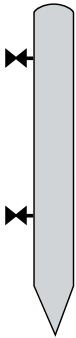

Diameter: 6 cm
Length: 175 cm

Diameter: 8 cm
Length: 200 cm

Handling Instructions

Our field fence fence posts are characterized by their versatility. The space between the posts can be 3 to 5 meters, depending on the electrical strip or other connecting materials.

1. Option
Attaching an electric cord with screwed in insulators
Post spacing: approx. 3 – 5 m

2. Option
Attaching a rope through drilled holes
Post spacing: approx. 3 – 5 m

3. Option
Attaching planks or boards
Post spacing: approx. 1 – 1,5 m
