\*<sup>1</sup> All technical data include characterisic features, which have been tested under specially defined conditions. Varying data may result from different conditions of usage such as loading method, prevailing temperature and length of storage time. Our service team is pleased to be at your disposal to check the special requirements of your individual application.

\*2 Static load: resistance to pressure on a flat ground surface and an evenly distributed load at a room temperature of approx. 20 °C.

Dynamic load: on a forklift with an evenly distributed load at a room temperature of approx. 20 °C. In racking system: evenly distributed load (sacks) along the longitudinal sides. Resting on two supports for over 100 h at a room temperature of approx. 20°C.

\*<sup>a</sup> Although still within ISO compulsory range, the load-bearing test results using pallets made from regranulated material show slightly more variation than those from virgin HDPE.
